Summary

BIM Architect with 4+ years of experience delivering large-scale residential, commercial, and healthcare projects across Egypt, Saudi Arabia, and the UAE. Expert in **Revit-driven workflows** (LOD 350+) and multidisciplinary Arc/Str/MEP coordination. Proven track record managing BIM lifecycles for developments exceeding 150,000 m² with zero construction-phase conflicts. Eligible for **Saudi Council of Engineers (SCE)** registration. Open to remote, hybrid, and on-site engagements. Available GMT+2.

Education

Faculty of Engineering, Mansoura University, Bachelor of Architecture 09/2018 – 05/2023
Mansoura
• Degree recognized for Saudi Council of Engineers (SCE) registration eligibility.

KAITECH Academy, Architectural BIM Diploma 08/2024 – 04/2025
Online
• Focus on Advanced Revit, Navisworks Coordination, and BIM Lifecycle Management.

Professional Experience

EDEC, BIM Architect, (Part-Time) 06/2025 – Present
Remotely
• **Technical Leadership:** Directing high-precision shop drawings and full project documentation for multi-thousand m² luxury estates.
• **Full-Cycle BIM Management:** Delivering architectural BIM modeling and bespoke facade designs for institutional and healthcare facilities.
• **Technical Execution & Procurement:** Producing construction-ready shop drawings and data-driven BOQs to streamline design-to-procurement transition.
• **Regulatory Management:** Managing full statutory licensing packages for municipal approvals and site execution plans.

AL-ORABI Engineering Consulting, BIM Architect, (Full-Time) 09/2024 – Present
New Damietta
• **Master Planning & Urban Design:** Spearheading site circulation and landmark architectural conceptualization for large administrative complexes.
• **BIM Optimization (LOD 350+):** Directing advanced modeling and proactive Arc/Str/MEP clash coordination to eliminate technical conflicts before construction.
• **Automated Estimation:** Leveraging Revit schedules for blockwork and finishes, significantly streamlining procurement.
• **Lifecycle Management:** Overseeing projects from concept through construction-ready documentation and licensing.

DIZ Studio, Architect, (Part-Time) 02/2022 – 06/2024
Remotely
• Conceptualized high-performance external facades and delivered comprehensive shop drawings for residential and commercial developments, ensuring seamless transitions from design intent to construction.

VISION INTERNATIONAL GROUP, Architect, (Full-Time) 07/2023 – 08/2024
New Damietta
• **BIM Management & Coordination:** Leading schematic design and multidisciplinary BIM coordination to resolve structural-architectural conflicts early in the workflow.
• **Advanced Revit Modeling:** Developing complex Revit models for large-scale park projects, reconciling intricate site contours with architectural requirements.
• **Project Licensing:** Authoring technical documentation and licensing packages ensuring full regulatory compliance.

Freelance, Architect, (Part-Time) 2022 – Present
Remotely
• Partnering with private clients and architectural firms to deliver bespoke interior and exterior design solutions.
• Delivered BIM modeling, interior & exterior design, and technical documentation for 10+ private clients across Egypt and the GCC.

Skills

BIM Management & Cloud Collaboration

- **Cloud Platforms & CDE:** Autodesk BIM 360 and Autodesk Construction Cloud (ACC).
- **Information Management Standards:** ISO 19650 protocols for standardized BIM information delivery.
- **OpenBIM Workflows:** IFC and BCF standards for seamless interdisciplinary data exchange.

BIM & Digital Coordination

- **High-LOD Modeling:** Expert-level Revit (LOD 350+) and advanced Revit Family Creation for parametric assemblies.
- **Interdisciplinary Coordination:** Clash detection and resolution across Arch/Str/MEP using Navisworks.
- **4D & 5D BIM:** 4D scheduling (Revit + Navisworks TimeLiner) and 5D cost management via BOQ and spatial data extraction.

Design & Spatial Intelligence

- **Architectural Design:** Interior, Exterior, Facade, and Landscape design across residential and commercial sectors.
- **Urban Master Planning:** Large-scale site circulation, zoning compliance, and density optimization.
- **Precision Documentation:** Shop drawings, statutory municipal packages, and tender documentation.

Technical Execution & Leadership

- **Project Leadership & Client Relations:** Leading technical teams, streamlining workflows, and delivering compelling
- **Client Communication & Presentations** to translate complex data into clear design narratives.

Software & Platform Toolkit

- **BIM Management :**Autodesk BIM 360, Autodesk Construction Cloud (ACC)
- **BIM & Coordination :**Revit (Expert), Navisworks (Advanced)
- **CAD & 3D:**AutoCAD, 3ds Max
- **Rendering :**Lumion, V-Ray
- **Creative Suite :**Adobe Photoshop

Selected Projects

La-Mer Compound

- Managed full-scope BIM development (LOD 350+) for a 150,000m² residential community of 30+ structures across 3 typologies (villas, apartments & townhouses), coordinating Arc/Str/MEP disciplines with zero construction-phase conflicts.

Lamar Gate (30,000 m2)

- Led urban master planning and BIM documentation for a 30,000m² mixed-use administrative hub, delivering construction-ready packages including facade systems, site circulation, and full municipal licensing drawings.

Square Business Hub (10,000m2)

- Directed the full BIM lifecycle for a 10,000m² commercial hub — from concept through to construction-ready shop drawings, automated BOQ extraction, and statutory municipal licensing approval.

Meydan Villa (5,000m2)

- Spearheaded the architectural redesign and full BIM documentation for a 5,000m² high-end private villa complex, delivering LOD 350 models with bespoke interior finish schedules and construction-ready shop drawings.

Supply Chain (Riyadh)

- Delivered full-cycle BIM modeling and bespoke facade designs for institutional healthcare facilities — sector directly aligned with Saudi Vision 2030 Health Infrastructure targets — ensuring seamless integration between design and procurement.

Royal Meadows

- Developed advanced Revit models for a large-scale park development, reconciling complex site contours across multiple landscape zones with full Arc/Civil coordination.
